scubadiving with TOPDIVE

The Tetiaroa atoll is a natural jewel of the South Pacific.

Completely untouched by human impact, this beautiful island presents a breathtaking turquoise blue lagoon with lush vegetation – just like a place in our dreams.

Benefiting from a wildlife protection and preservation program, Tetiaroa is another sanctuary of biodiversity in the Pacific.

During the dives, you will encounter many colorful fish in their coral habitat (triggerfish, parrotfish, surgeonfish). You will also see big animals that frequent the external slope of the reef: white tip sharks, grey sharks, spotted eagle rays, turtles, dogtooth tuna...

whale watching with TOPDIVE

Every year, from August to October, Polynesian waters welcome many humpback whales (*Megaptera novaeangliae*) coming to mate and give birth before returning to the South pole.

In the comfort of our covered boats and in the hands of experienced diving instructors and divemasters onboard,

we offer the best conditions for a safe approach with a deep respect for the animals.

Sometimes you can get lucky and have an opportunity for a snorkeling session with some whales and their young.

An unforgettable experience !
